

Telco Box

Multi-application

Eltek Valere's Telco Box is designed for standalone use or as a mounted accessory for Eltek Valere cabinets. It is a convenient solution for DC surge suppression, line protection, and low-power MDU applications.

Applications

The Eltek Valere Telco box is a customizable unit that can be outfitted with low-power rectifier systems, like Eltek Valere's LP and Micropack DC power systems, for MDU applications. The box can be mounted to Eltek Valere's 303030 and 303040 cabinets and provides a convenient location for DC surge suppression or line protection.

Features

- High-density polyethylene (HDPE) backer board
- Customizeable bottom plate for cable entry
- Two 4" cable pass-through holes with optional NEMA 4X plugs
- Mountable on Eltek Valere cabinets with 30U and 40U rack heights.
- Optional 6RU, 19" equipment rails
- Door alarm with temporary defeat
- Optional copper ground bar with 6 dual-hole lug positions
