FOR IMMEDIATE RELEASE

55W COMPACT MEDICAL / ITE POWER SUPPLY

Wrentham, MA. Power Sources Unlimited, a leading technical distributor of power supplies and related products, has introduced the TriMag DZ065 Series of 55W AC/DC power supplies. The Series is certified to worldwide medical and IT standards (EN60601-1 and EN60950) making them suitable for a variety of industrial, medical and communications applications. EMI performance meets Level B for both EN55011 and EN55022 standards.

A miniature, low profile 2" x 4" x 1.2" footprint, or an optional U-channel or enclosed chassis, further lends to the DZ065 Series' flexibility. They accept a universal 90-264VAC input and provide single outputs ranging from 3.3VDC to 48VDC.

The units are highly efficient, specify low leakage current of 300uA max at 240VAC, and have a double fused input. The operating temperature is from 0-60C and comprehensive overvoltage, short circuit and over load circuitry is standard.

Pricing starts at \$30.00 for 100 piece quantities, with significant OEM discounts available. Download full specifications and procure parts on-line at <http://www.psui.com>. For sales or applications inquiries, please contact Power Sources Unlimited, toll free at 800-966-7784 or email sales@psui.com.
