## **FOR IMMEDIATE RELEASE**

### **POWER SOURCES UNLIMITED FEATURES MGE UPS PULSAR EVOLUTION UNINTERRUPTIBLE POWER SUPPLIES**

Power Sources Unlimited, a technical distributor of power supplies and power related products, announces the MGE UPS Systems Pulsar Evolution, a reliable, ultra-compact power protection solution for networking equipment, rack optimized servers and network storage systems.

The Pulsar Evolution products are available in either 1U/2U rack or tower configurations with ratings ranging from 500-3000VA. Hot swappable batteries are standard in all models and battery extension modules can be added to some units for additional backup time of over four hours. Programmable outlets can be used for remote resets or to allocate longer backup times to critical equipment.

The Pulsar Evolution uses a high frequency, line interactive technology to deliver a sinewave output, correcting voltage variations and offers wide input voltage tolerances. All models come with a USB port and serial port for compatibility with existing and future machines. Free Solution-Pac software provides advanced power management or configurations of multiple servers or SNMP or Web-based remote monitoring.

Units are safety certified to UL, cUL and TUV standards and offer a 2 year warranty. Pricing starts from \$365.00 for the 500VA model.

For sales or applications inquiries, please contact Power Sources Unlimited at 800-966-7784, email to [sales@psui.com](mailto:sales@psui.com) or visit [www.psui.com](http://www.psui.com).
