FOR IMMEDIATE RELEASE

POWER SOURCES UNLIMITED ANNOUNCES 160 WATT, 3" x 5" AC/DC POWER SUPPLY WITH ATX OUTPUTS

Power Sources Unlimited announces the XL160 Series of ultra small, highly efficient ac/dc power supplies which pack 160W of power into a 3" x 5" x 1.25" package.

The XL160 Series features a universal 90-264VAC input with active PFC. Nine models provide single or multiple outputs (single output models come with a secondary 12VDC/1A). Two models provide ATX outputs in the same 3" x 5" package, perfect for applications where the end user does not have the physical space that a traditional ATX supply requires.

The design features efficiencies up to 90%, comprehensive protection circuitry, remote sense on the primary output, and built-in OR'ing diodes for N+1 operation.

Worldwide safety compliance to Information Technology Equipment standards, RoHS compliance, and an MTBF in excess of >200,000 hours make the XL160 Series ideal for any application.

Units are competitively priced, starting at only \$71.00 for OEM quantities. Full specifications and online procurement is available at <http://www.psui.com>, or contact us at 800-966-7784, sales@psui.com.
